* REVISIONS FOR 1979

INVENTORY DOWN 4 PERCENT: U.S. inventory of all hogs and pigs is estimated at 64.5 million head on December 1, 1980, according to the Crop Reporting Board. This is 4 percent below a year ago but 7 percent more than December 1, 1978.

-- Breeding inventory at 9.16 million is 5 percent below both a year ago and December 1, 1978.

-- Market hog inventory at 55.4 million is 4 percent fewer than a year earlier but 9 percent more than two years ago.

The 14 QUARTERLY STATES with 54.8 million head on December 1 are down 4 percent from a year earlier but 7 percent greater than December 1, 1978. These 14 States account for approximately 85 percent of the total U.S. hog and pig inventory.

1980 PIG CROP: The U.S. pig crop for 1980 totaled 102 million head, 1 percent below 1979 but 15 percent above the 1978 pig crop.

-- December 1979 - May 1980 pig crop, estimated at 52.3 million head, is up 3 percent from a year earlier and 23 percent above the comparable period two years ago.

-- June-November 1980 pig crop, estimated 49.3 million head, is 5 percent fewer than a year ago but 7 percent above the June-November 1978 crop.

A total of 6.84 million sows farrowed during June-November 1980 -- 6 percent fewer than a year earlier. The litter size during this period averaged 7.21 compared with 7.13 a year earlier.

In the 14 QUARTERLY STATES, The June-August 1980 pig crop totaled 20.4 million head, 10 percent below the same quarter a year ago. For the September-November period, the pig crop of 21.3 million head decreased 2 percent from the same period during 1979.

FARROWING INTENTIONS: U.S hog producers intend to have 6.78 million sows farrow during the December 1980-May 1981 period, 6 percent below both a year ago and the same period two years ago.

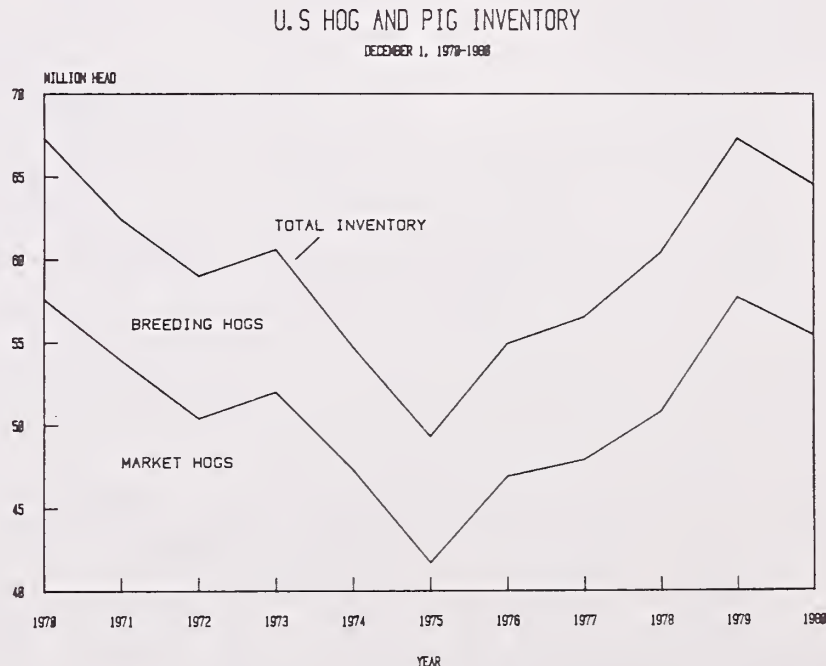

These intentions and projected litter size indicate a pig crop of 48.5 million, 7 percent below 1980 and 4 percent below the December 1978-May 1979 crop.

Intentions in the 14 Quarterly States totaled 2.58 million sows to farrow during December 1980-February 1981 period, 6 percent fewer than the same period last year. The March-May 1981 intentions at 3.18 million are 5 percent below the March-May 1980 quarter.

RELIABILITY AND ESTIMATING PROCEDURES: Primary data used in setting these hog estimates were obtained from a sample of farmers across the U.S. using probability surveys. Information was collected by mail, telephone and personal interviews. Since all operations raising hogs were not included in the sample, survey estimates are subject to sampling variability. This variability, as measured by the relative standard error, is about two percent at the U.S. level for hog inventory. This means that chances are approximately 95 out of 100 that survey estimates will be within four percent of the complete coverage value if the same procedures were used to survey all producers. Survey estimates are also subject to non-sampling errors such as omissions, duplications, and mistakes in reporting, recording and processing the data. These errors cannot be measured directly, but they are minimized through rigid quality controls in the data collection process and a careful review of all reported data for consistency and reasonableness.

The sampling variability of survey estimates on intended farrowings is slightly larger than that for inventories. More important, actual farrowings may differ significantly from reported intentions due to unexpected economic and environmental conditions. These differences have exceeded four percent for about one-third of the quarterly pig crops during the last six years.

In setting the inventory estimates, the Crop Reporting Board constructed a U.S. balance sheet using estimates on births, deaths and check data on slaughter, imports and exports. This balance sheet provided an additional check on survey inventory estimates.

Released: December 23, 1980

NEW MEXICO

The December 1, 1980 inventory of all hogs and pigs in New Mexico is estimated at 74,000 head, according to the New Mexico Crop and Livestock Reporting Service. This number is 13,000 fewer than a year ago but 24,000 head above the number on hand two years ago. Of the total, 12,000 head were held as breeding stock and 62,000 were classed as market hogs.

The December 1979 - May 1980 pig crop totaled 42,000 head, 16,000 fewer than a year earlier. There were 6,000 sows farrowed, 3,000 less than a year earlier, with an average of 7.0 pigs saved per litter compared to 6.4 the previous year.

The June - November 1980 pig crop is estimated at 68,000 head, down 6,000 head from the 1979 crop of 74,000. The number of sows farrowed during this period is estimated at 9,000, 3,000 fewer than a year ago. Litter average size at 7.6 pigs saved per sow compares with 6.2 in 1979.

There were 2,100 operations with hogs in 1980, 200 more than the year before. Total value of hog inventory was 4,588 thousand dollars at \$62.00/head in 1980. Comparable figures for 1979 were 4,916 thousand dollars total value at \$56.50 head.

UNITED STATES

U.S. inventory of all hogs and pigs is estimated at 64.5 million head on December 1, 1980. This is 4 percent below a year ago but 7 percent more than December 1, 1978.

-- Breeding inventory at 9.16 million is 5 percent below both a year ago and December 1, 1978.

-- Market hog inventory at 55.4 million is 4 percent fewer than a year earlier but 9 percent more than two years ago.

The 14 quarterly States with 54.8 million head on December 1, are down 4 percent from a year earlier but 7 percent greater than December 1, 1978. These 14 States account for approximately 85 percent of the total U.S. hog and pig inventory.

1980 PIG CROP: The U.S. pig crop for 1980 totaled 101.6 million head, 1 percent below 1979 but 15 percent above the 1978 pig crop.

-- December 1979 - May 1980 pig crop, estimated at 52.3 million head, is up 3 percent from a year earlier and 23 percent above two years ago.

-- June - November 1980 pig crop, estimated at 49.3 million head, is 5 percent fewer than a year ago but 7 percent above the June - November 1978 crop.

A total of 6.84 million sows farrowed during June - November 1980 -- 6 percent fewer than a year earlier. The litter size during this period averaged 7.21 compared with 7.13 a year earlier.

In the 14 quarterly States, the June - August 1980 pig crop totaled 20.4 million head, 10 percent below the same quarter a year ago. For the September - November period, the pig crop of 21.3 million head decreased 2 percent from the same period during 1979.

FARROWING INTENTIONS: U.S. hog producers intend to have 6.78 million sows farrow during the December 1980 - May 1981 period, 6 percent below both a year ago and the same period two years ago.

These intentions and projected litter size indicate a pig crop of 48.5 million, 7 percent below 1980 and 4 percent below the December 1978 - May 1979 crop.

Intentions in the 14 quarterly States totaled 2.58 million sows to farrow during December 1980 - February 1981 period, 6 percent fewer than the same period last year. The March - May 1981 intentions at 3.18 million are 5 percent below the March - May 1980 quarter.
